ExtraHop

ExtraHop Reveal(x) for NIS2 Compliance

Manage Risk and Mitigate Threats

The Network and Information Security (NIS) Directive aims to enhance cybersecurity for critical information infrastructure across European Union Member States. As a result of the updated NIS2 Directive, organizations in industries such as energy, transport, banking, financial markets, and public administration need to meet the new directive's updated obligations by October 2024.

With ExtraHop Reveal(x), cybersecurity and risk management leaders in regulated industries can take proactive steps to ensure compliance with NIS2 requirements before and after the upcoming deadline for compliance.

Reveal(x) enables security teams to:

- **Maintain a comprehensive view of relevant assets** with automated and continuous device discovery, as well as real-time behavioral monitoring and analysis.
- **Establish processes to manage risk and mitigate threats** to critical services with full visibility into traffic traversing the network and device details such as whether an asset is HTTP/SSL server.
- **Identify threats in real-time** with rules and behavioral-based detections backed by advanced analytics.
- **Quickly investigate security incidents and meet reporting obligations** with 90 days of transaction records and streamlined investigative workflows to drill down to forensic evidence in clicks, not days.

The Reveal(x) network detection and response (NDR) platform integrates with a wide range of industry leading cybersecurity vendors to automate response and enforce defined policies. Reveal(x) is available from trusted partners and distributors throughout the European Union. For more information, visit extrahop.com.

Prepare for NIS2 with ExtraHop

- Cyber-risk management
- Incident management
- Zero Trust framework support
- Policy enforcement control
- Reporting obligations
- Business continuity
